PROJECTS

Analog Clock

"I built an analog clock using HTML, CSS, and JavaScript, combining design elements and real-time updates to display the current time dynamically."

live Demo:

<https://kaviyaannadurai13.github.io/javascript/Analog%20clock/>

To-Do List

"I developed a dynamic to-do list using HTML, CSS, and JavaScript, enabling users to add, remove, and mark tasks for a streamlined task management experience."

live demo:

<https://kaviyaannadurai13.github.io/javascript/todo%20list/>

Age Calculator

"I crafted an age calculator using HTML, CSS, and JavaScript, allowing users to input their birthdate and instantly calculate their age with an interactive and responsive interface."

live demo
